

**PROJECT:** *Design, manufacture and installation of heating system for 290 tonne capacity galvanising kettle.*

**CLIENT:** *Industrial Galvanizers Limited  
Hexham, New South Wales*

**REFERENCE:** *14322*

**DETAILS:** *Pictured are the beginnings of the plant room assembly for the largest top fired hot dip galvanizing plant in the Southern Hemisphere. A heating hood and hi-tech burner control system designed by Air and Gas Industries contributed to this facility being the flagship of efficiency for its owner Industrial Galvanizers.*
