Ongoing Safety and Reliability

- Vessel Capacity maximised to suit application
- Environmental Compliance QLD (ERA 57)
- AS4343 Hazard Level E
- Spoil Tanks designed to AS1210

The AirVAXX ST25-MP500 tri-axle liquid waste vacuum tanker is designed for single crew member operation.

This commercial waste recovery vehicle is capable of collecting general waste including grease trap, septic, sludge and oily water waste.

This specific unit has a 25000 litre combination vacuum/ pressure vessel made from high strength carbon steel and is equipped with an underslung rotary vane pumping system.

Vessel capacity can be adjusted to suit your application. Liquid ring and blower pumping systems are also available with this unit. Pumping systems can also be mounted on the front of the trailer.

Optional features include installation of the AirVAXX Vacuum Pump Odour Control Unit which works to eliminate the smell of your vacuum pump exhaust.

We offer numerous options and all of our tankers can be customised to suit your specific needs. Give us a call to get your next project started!
