Air & Gas Industries

AIRVAXX

Ongoing Safety and Reliability

- General Waste and DG options
- Marrel Skip configuration also available
- Approved to DG Waste Classes 3, 5.1, 6 and 8
- AS1210, Hazard Level B
- Robust Construction

Air and Gas Industries has developed its range of AirVAXX liquid waste tankers to include stand-alone Hook-lift Liquid Waste Systems for general liquid waste and dangerous goods (DG).

The unit is capable of carrying high density sludge liquid waste products that contain quantities of lubricants, combustible liquids and toxic or corrosive substances.

Spoils tanks fitted to AirVAXX Hook-lift Liquid Waste Systems are designed and certified to AS1210, Hazard Level B.

Optional features that can be added include a Liquid Ring pumping system.

Specifically designed and approved to transport products classified as Class 3, 5.1, 6 and 8 Dangerous Goods Waste Liquids.

Also available in a Marrel Skip configuration.

We offer numerous options and all of our units can be customised to suit your specific needs. Give us a call to get your next project started!
