Air & Gas Industries

AIRVAXX

Ongoing Safety and Reliability

**Introducing the Vacuum Pump
Odour Control Unit engineered by
AirVAXX!**

**The AirVAXX Vacuum Pump Odour
Control Unit works to eliminate the
smell of your vacuum pump
exhaust.**

**This unit can be installed in the
pumping system pipework to inject
E60 neutralizer into the airstream,
leaving an odour free exhaust.**

**The deodoriser unit incorporates a
venturi-injection system,
eliminating the need for unreliable
electric dosing pumps.**

**With some simple plumbing, the
product is ready for use.**

**Give us a call to add this to your
next project!**
