AIRVAXX

Ongoing Safety and Reliability

- 6 x 4 Cab Chassis
- Single Crew member operation
- 15 degree tipping angle (other options available)
- Built to AS1210
- Full opening Rear Door

The AirVAXX RT11 Liquid Waste Vacuum/ Pressure Tipping Tanker is a non-destructive digging and general waste recovery vehicle designed for transporting sludge, oily water, grease trap and septic waste.

Standard features include an 11 kL storage vessel and 1560 m³/hr blower pumping system. The unit is also equipped with a full opening rear door and tipping system which are both hydraulically controlled.

Fitted with 2 x side mounted water tanks for a total of 1300 litre water capacity.

Includes a Class B Hydro Excavation pump capable of 23 LPM @ 5000PSI (other flow rates and pressures are available, Class A options are available).

The vessel is made from High Strength Carbon Steel (Aluminium Alloy and Stainless Steel options available).

Some common optional features include tow couplings, overhead boom and remote controls.

We offer numerous options and all of our tankers can be fully customised to suit your specific needs. Give us a call to get your next project started!
